

Gage Watson Memorial Scholarship

Gage was diagnosed with leukemia at age 2. He then spent the majority of the next 11 months of his life in the hospital fighting. During this time, he and his family were shown so much love, support and compassion from the community. Gage lost his battle at age 3. He was so energetic and so very full of life. He will never be able to live out his dreams his family had for him, but they would love to be able to help another child make their dreams come true. This scholarship is open for any graduating senior who wishes to pursue his/her education in a health/science field. Please complete the application. Also, on a separate piece of paper, in your own handwriting, discuss your decision to pursue a career in the health/science field and how this will benefit you, your family and your community.

All applications must be completed and submitted to the Guidance Counselor by April 30th to be considered.

The scholarship is in the amount of \$500.
